Cash Flow Statement	6
Statement of Changes in Shareholders' Equity	7~8
Notes to the Financial Statements	9~30

## Auditor's Report

Mao Heng kuai Bao (2026) No. 11005

To Harsha Precision Bearing Components (China) Co., Ltd.:

### I. Audit Opinion

We have audited the financial statements of Harsha Precision Bearing Components (China) Co., Ltd. (the "Company") attached hereto, which comprise the balance sheet as at Dec. 31, 2025, and the income statement, the statement of cash flows, and the statement of changes in owner's equity for the year then ended, and notes to the financial statements.

In our opinion, the financial statements of the Company are properly drawn up in accordance with the Accounting Standards for Business Enterprises so as to, in all material respects, give a true and fair view of the financial position of the Company as at Dec. 31, 2025, and of the performance and cash flows of the Company for the year ended on that date.

### II. Basis for Our Opinion

We have conducted the audit in accordance with the Auditing Standards for CPAs of China. The "CPAs' Responsibilities for Auditing Financial Statements" section hereof has further explained our responsibilities pursuant to such auditing standards. In compliance with China Code of Ethics for CPAs, we are independent of the Company, and have complied with applicable ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

### III. Responsibilities of the Company's Management and Operation Team for Financial Statements

The management of Harsha Company (hereinafter referred to as the management) is responsible for compiling financial statements in accordance with the provisions of the Accounting Standards of Enterprises to achieve fair reflection, and to design, implement and maintain the necessary internal controls so that the financial statements do not contain any major misstatements caused by fraud or error.

When preparing the financial statements, the Company's management shall evaluate the Company's going-concern ability, disclose matters related to going-concern and apply going-concern assumption, unless the management plans to liquidate the Company or discontinue its operation, or has no other choices.

The Company's management is responsible for the financial reporting of the Company.

#### IV. CPAs' Responsibilities for Auditing Financial Statements

Our responsibility is to obtain reasonable assurance about whether the financial statements are free from material misstatement due to fraud or error, and to issue an audit report accordingly (including the audit opinion on these financial statements). Reasonable assurance is high-level assurance, but it doesn't guarantee that the audit conducted according to applicable auditing standards can identify all material misstatements. Misstatements may arise from fraud or error. If pursuant to rational expectations misstatements may, individually or together, exercise an impact on users of the financial statements in making economic decisions based on them, then such misstatements are regarded as material ones.

During the audit conducted as per the accounting standards, we have made professional judgments and maintained professional skepticism. Besides, we have carried out the following work:

- (1) Identify and evaluate the risks of material misstatements of the financial statements (whether due to fraud or error), design and implement audit procedures to cope with such risks, and obtain sufficient and appropriate audit evidence to provide a basis for our audit opinion. As fraud may involve collusion, falsification, deliberate omission, false statements or incompliance with internal control, the risk of failure in identifying material misstatements due to fraud is higher than that in identifying material misstatements due to error.
- (2) Understand the Company's internal control related to the audit, and design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of such internal control.
- (3) Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and relevant disclosures made by the Company's management.
- (4) Draw a conclusion on the appropriateness when it comes to how the Company's management applies going-concern assumption, and on whether there is any matter that may lead to substantial doubt with or whether there is any great uncertainty with the Company's going-concern ability. If there is such great uncertainty, then according to applicable auditing standards, we shall, in the audit report, draw attention from users of the financial statements to relevant disclosures in them; and if the disclosures are insufficient, we shall give modified audit opinions. Our audit opinion is based on information available as of the audit report. However, it is possible that future matters or circumstances may result in the Company's failure in maintaining going-concern ability.
- (5) Evaluate the overall presentation, structure and content (including disclosures) of the financial statements, and whether they have given a true and fair view of relevant transactions and matters.
- (6) Obtain adequate and appropriate audit evidence on the Company's financial information to give our audit opinion. We are responsible for guiding, supervising and carrying out the audit and express our audit opinion.

We have communicated with the Company's operation team regarding proposed audit scope, audit schedule and major audit findings, etc., including key defects with the Company's internal control that are identified by us during the audit.

English translation is for reference only. Should there be any discrepancies between the Chinese and English versions, the Chinese version shall prevail.

## Notes to the financial statements for the year 2025

(The amount is expressed in RMB Unless otherwise stated)

### 1 Company profile

Harsha Precision Bearing Components (China) Co., Ltd.(hereinafter referred to as "the Company", formerly known as "BecoTek Precision Bearing Accessories (Suzhou) Co., Ltd.") was established on March 30, 2008 with the approval of the People's Government of Jiangsu Province, and obtained a business license on April 28, 2008. The current business license's unified social credit code is 91320594673917075C. The original legal representative is HEMANT KUMAR SHARMA, which was changed to Guo Guangjun on November 18, 2021. Company address: 10 Fuhua Road, Bixi Street, Changshu, Jiangsu Province.

The original registered capital of the company was USD 22 million, and the accumulated paid-in capital was USD 20.19449 million. On September 1, 2019, Harsha Precision Bearing Components (China) Co., Ltd. and Harsha Engineering Components (Changshu) Co., Ltd. carried out absorption and merger, which was in the form of absorption and merger under the same control, without any consideration payment. After the completion of the merger, Harsha Engineering Components (Changshu) Co., Ltd. was dissolved and cancelled, and Harsha Precision Bearing Components (China) Co., Ltd. continued to exist. The registered capital and paid-in capital increased by USD 3,699,976 respectively. After the merger, the registered capital of the company was USD 25,699,976, and the accumulated paid-in capital was US \$23,894,466.

The approved business scope of the company: Research and development, production, processing, sales of various mechanical parts such as precision bearing support frame, and provision of relevant supporting services; Engaged in the wholesale, import and export of mechanical parts. (Projects subject to approval according to law can only be operated after being approved by relevant departments)

### 2 Basis of preparation of financial statements

#### 2.1 Basis of preparation

The company's financial statements are based on the assumption of continuous operation, according to the actual transactions and events, in accordance with the "Enterprise Accounting Standards - Basic Guidelines" issued by the Ministry of finance, Specific Accounting Standards, Application Guidelines for Enterprise Accounting Standards, Accounting Standards for Enterprises, and other relevant provisions (hereinafter referred to as "Enterprise Accounting Guidelines").

According to the relevant provisions of the Enterprise Accounting Standards, the accounting of the company is based on accrual basis. Except for some financial instruments, the financial statements are based on historical costs. If assets are impaired, corresponding impairment

provisions shall be made in accordance with relevant provisions.

## **2.2 Going-concern assumption**

The company does not have any matters or circumstances that have significant doubts about the company's ability to continue as a going concern for 12 months from the end of the reporting period.

## **3 Major accounting policies, accounting estimates**

### **3.1 Statement on observation of Corporate Accounting Standards**

The financial statements prepared by the Company are in conformity with the Corporate Accounting Standards, constituting an accurate and full presentation of the financial position, the operating result and the cash flow of the Company for the reporting period.

### **3.2 Accounting year**

The company's accounting period is divided into annual and mid-term, which is shorter than the reporting period of a complete accounting year. The fiscal year of the Company shall be in the Gregorian calendar year, i.e. from January 1 to December 31 each year.

### **3.3 Business cycle**

The normal business cycle refers to the period from the purchase of assets for processing to the realization of cash or cash equivalents. The company takes 12 months as a business cycle and uses it as a criterion for liquidity classification of assets and liabilities.

### **3.4 Recording currency**

The recording currency of the Company is Ren Min Bi (RMB).

### **3.5 Standards for determining cash and cash equivalents**

The company's cash and cash equivalents include cash in stock, deposits that can be used to pay at any time, and investments with a short period of time (usually due within three months from the date of purchase), strong liquidity, easy conversion to a known amount of cash and little risk of value change.

### **3.6 Receivables**

Receivables include accounts receivable, notes receivable, other receivables, etc.

#### **(1) Recognition criteria for bad debts**

Receivables that cannot be recovered after being paid off according to law due to the debtor's bankruptcy; If the debtor fails to fulfill the debt repayment obligation after three years, the receivables that are listed as bad debts with the approval of the shareholders' meeting or the board of directors, and other impaired claims are assessed as uncollectible, they shall be derecognized.

#### **(2) Accounting method for bad debt loss**

The Company adopts the allowance method to account for bad debt losses.

(3) Withdrawal of bad debt reserves

For accounts receivable and other receivables, the Company adopts individual identification method to withdraw bad debt reserves.

### **3.7 Inventory**

(1) Classification of inventory

The Company's inventory is divided into raw materials, finished products, semi-finished products, products in process, tooling and low-value consumables.

(2) Valuation methods for acquisition and issuance of inventory

The Company's inventory system mainly adopts the perpetual inventory system, and the inventory is valued at the actual cost when it is obtained. Raw materials shall be priced with weighted average method; Products in process, goods in stock and goods delivered follow standard cost method; Low-value consumables items charged to expense when actually consumed.

(3) The method of calculating the reserve for inventory depreciation

If the company's end-of-term inventory cost is higher than its net realizable value, the reserve for depreciation of inventory price shall be calculated. The company usually draws down the stock price reserve according to a single item (inventory item). At the end of the period, the influence factors of the previous write-down of the stock value have disappeared, and the stock price reserve is turned back within the original amount.

(4) Confirmation method of net realizable value of inventory

Net realizable value of inventory is the amount of estimated costs, estimated sales costs and tariff charges after deducting the estimated price of the inventory from the estimated price to the completion time.

### **3.8 Fixed assets and their accumulated depreciation**

(1) Conditions for confirmation of fixed assets

Fixed assets of the company refer to tangible assets held for the production of commodities, the provision of labor services, leasing or operation and management, whose service life exceeds one accounting year.

The economic benefits related to the fixed assets are likely to flow into the enterprise, and the fixed assets can be recognized only when the cost of the fixed assets can be reliably measured.

The company's fixed assets are initially measured at the actual cost at the time of acquisition.

(2) Classification of Fixed Assets and Depreciation Policy

The company adopts the method of average years to calculate depreciation. The depreciation of fixed assets begins when they reach the intended usable state, and stops when they are terminated or divided into holdings of non-current assets for sale. Without considering the impairment provision, the company determines the annual depreciation rate of all types of fixed assets according to the category of fixed assets, expected service life and estimated residual value as follows:

Harsha Precision Bearing Components (China) Co., Ltd.  
Notes to the financial statements

Category	Economic useful life	Residual rate at the end of life	Annual depreciation rate(%)
House and buildings	20	5	4.75
Machinery and equipment	5, 10	5	9.5, 19
Auxiliary production equipment	5	5-10	18-19
Office equipment	5	5-10	18-19
Computer and electronic equipment	3-10	5	9.5-31.67
Transportation equipment	5	5	19.00

Among them, the accumulated amount of the impairment provision for fixed assets that have been calculated shall be deducted to calculate and determine the depreciation rate.

If the fixed assets financially leased can reasonably determine that the ownership of the leased assets will be acquired at the expiration of the lease term, depreciation shall be calculated within the useful life of the leased assets; if the ownership of the leased assets can not be reasonably determined at the expiration of the lease term, a shorter period between the lease term and the useful life of the leased assets shall be available. Depreciation is charged between periods.

At the end of each year, the company reviews the service life, estimated net residual value and depreciation method of fixed assets. If the estimated service life is different from the original estimate, the service life of fixed assets shall be adjusted; if the estimated net residual value is different from the original estimate, the estimated net residual value shall be adjusted.

### (3) Expenses for major repairs

The overhaul expenses incurred in the periodic inspection of fixed assets by our company are included in the cost of fixed assets and in the profits and losses of the current period when there is conclusive evidence that the part that meets the conditions for the confirmation of fixed assets is included in the cost of fixed assets and that the part that does not meet the conditions for the confirmation of fixed assets is included in the current profits and losses. Fixed assets shall be depreciated at regular intervals between major repairs.

### 3.9 Method of amortization of long-term pending expenses

The long-term outstanding expenses incurred by the company are valued at the actual cost and amortized on average according to the expected benefit period. For long-term anticipated cost-sharing items which can not benefit from the future accounting period, the amortized value of the items is totally included in the current profits and losses.

### 3.10 Employees' Salary

The company's employees' salaries mainly include short-term salaries, after-service benefits and dismissal benefits. Among them:

Short-term remuneration mainly includes wages, bonuses, allowances and subsidies, employee welfare, medical insurance, maternity insurance, industrial injury insurance, housing accumulation fund, trade union funds, employee education funds, non-monetary welfare and so on. During the accounting period in which employees provide services to the company, the company recognizes the actual short-term salaries of employees as liabilities and takes them into

account the current profits and losses or the cost of related assets. Among them, non-monetary welfare is measured at fair value.

After-service benefits mainly include setting up withdrawal plans. Among them, setting up withdrawal plan mainly includes basic old-age insurance, unemployment insurance and annuity. The corresponding amount of deposit payable is included in the cost of related assets or current profits and losses when it occurs.

In case the company cannot unilaterally withdraw the retirement benefits provided by the plan for termination of labor relations or the proposal for reduction, it shall confirm with the company the reconstitution of the retirement benefits involved in the payment of the retirement benefits, either before the expiration of the employee's labor contract or in order to encourage the employee to accept the reduction voluntarily. Where is the cost related to the restructuring involving the payment of dismissal benefits, the compensation liabilities of employees resulting from dismissal benefits should be recognized as early as possible, and should be included in current profits and losses. However, if the dismissal benefits are not expected to be fully paid 12 months after the end of the annual reporting period, they shall be treated according to the remuneration of other long-term employees.

The internal retirement plan for employees shall be handled in the same way as the dismissal benefits mentioned above. The company will pay the salary of the returnee and the social insurance premium paid during the period from the day when the employee ceases to provide service to the normal retirement date, and shall include the current profit and loss (dismissal benefits) when the conditions for recognition of the expected liabilities are met.

Other long-term employee benefits provided by the company to employees that meet the set-up withdrawal plan shall be accounted for according to the set-up withdrawal plan, in addition to accounting treatment according to the set-up income plan.

### **3.11 The Principle of Recognition of Income**

#### **(1) Sales of goods**

When the main risks or rewards in the ownership of a commodity have been transferred to the purchaser, the continued management and actual control of the commodity are no longer exercised, the relevant revenue has been obtained or the receipt evidence has been obtained, and the cost associated with the sale of the commodity can be reliably measured, the company confirms the realization of the sales revenue of the commodity.

#### **(2) Providing labor services**

If the results of the labor transaction can be reliably estimated, the company will confirm its revenue at the end of the term according to the percentage of completion method.

If the result of the service transaction cannot be estimated reliably, the service income will be recognized according to the amount of the service cost that has occurred and is expected to be compensated, and the service cost that has occurred will be regarded as the current cost. Income is not recognized if the incurred labor costs are not expected to be compensated.

Contracts or agreements concluded by the Company with other enterprises include the sale of goods and the provision of services. If the sale of goods and the provision of services can be distinguished and measured separately, the sale of goods and the provision of services will be treated separately; for example, the sale of goods and the provision of services can not be distinguished, or although they can be distinguished. If it cannot be measured separately, the

contract shall be treated as the selling commodity.

(3) Transferring the right to use assets

When the economic benefits related to the transfer of the right to the use of assets can be inflow and the amount of income can be reliably measured, the company recognizes the income.

### 3.12 Government Subsidies

Government subsidy refers to the company's acquisition of monetary or non-monetary assets from the government free of charge, excluding the capital invested by the government as an investor and enjoying the corresponding owner's rights and interests. Government subsidies are divided into assets-related government subsidies and revenue-related government subsidies. Where a government subsidy is a monetary asset, it shall be measured according to the amount received or receivable. If the government subsidies are non-monetary assets, they shall be measured in accordance with the fair value; if the fair value cannot be obtained reliably, they shall be measured in accordance with the nominal amount. Government subsidies measured in nominal amounts are directly recorded in current profits and losses.

Only when the company can meet the conditions attached to the government subsidy and receive the government subsidy can it confirm the government subsidy.

Government subsidies are divided into assets-related government subsidies and revenue-related government subsidies. The government subsidy related to assets refers to the government subsidy obtained by a company for purchase and construction or for the formation of long-term assets in other ways. Government subsidies related to income refer to government subsidies other than those related to assets.

Government subsidies related to assets shall be recognized as deferred income by the total amount method and shall be divided into profits and losses in stages according to a reasonable and systematic method during the service life of the relevant assets. If the relevant assets are sold, transferred, scrapped or destroyed before the end of the service life, the balance of the relevant deferred income that has not been allocated shall be transferred to the asset office. If the profits and losses of the current period and the recognized government subsidies need to be returned, the book balance of the related deferred income shall be reduced and the excess part shall be included in the current profits and losses.

Government subsidy related to revenue is directly included in current profits and losses when it is used to compensate the related costs or losses incurred by the company. When it is used to compensate the related costs or losses in the subsequent period, it is recognized as deferred income, and is included in current profits and losses during the period of confirming the relevant costs or losses.

For government subsidies that include both asset-related and revenue-related parts, different parts are separately accounted for; for those that are difficult to distinguish, the whole is classified as revenue-related government subsidies.

Government subsidies related to the company's daily activities shall be included in other earnings or cost deductions in accordance with the nature of economic operations. Government subsidies unrelated to the company's daily activities are included in the non-operating income and expenditure.

### 3.13 Deferred Income Tax Assets/Deferred Income Tax Liabilities

The difference between the book value of certain assets and liabilities and their tax base, as well as the temporary difference between the book value of items not recognized as assets and liabilities and the difference between the book value of items that can determine their tax base and the tax base according to the tax law, is confirmed by the balance sheet liability method and deferred income tax liabilities.

The deferred income tax liabilities related to the initial recognition of goodwill and the temporary difference of taxable income tax in the initial recognition of assets or liabilities arising from transactions that are neither mergers of enterprises nor affect accounting profits or taxable income (or deductible losses) at the time of occurrence are not recognized. In addition, if the company can control the turnaround time of temporary differences in taxable temporary differences related to investments of subsidiaries and joint ventures, the temporary differences will probably not be turned back in the foreseeable future and the related deferred income tax liabilities will not be recognized.

The deferred income tax assets concerned shall not be recognized for the deductible temporary differences related to the initial recognition of assets or liabilities arising from transactions that are neither mergers of enterprises nor affect accounting profits or taxable income (or deductible losses). In addition, the deductible temporary differences related to investments of subsidiaries, joint ventures and joint ventures are not recognized as deferred income tax assets if the temporary differences are unlikely to be reversed in the foreseeable future, or if the taxable income used to deduct the deductible temporary differences is unlikely to be obtained in the future. This is the case. Except for the above exceptions, the Company recognizes other deferred income tax assets that can offset temporary differences, subject to the amount of taxable income that is likely to be obtained to offset temporary differences.

For deductible losses and tax credits that can be carried over in subsequent years, the deferred income tax assets are recognized to the extent that future taxable income is likely to be obtained to offset deductible losses and tax credits.

On the balance sheet date, the deferred income tax assets and deferred income tax liabilities shall be measured at the applicable tax rate during the period of anticipated recovery of the relevant assets or liquidation of the related liabilities in accordance with the provisions of the Tax Law.

On the balance sheet date, the book value of deferred income tax assets is reviewed. If it is likely that sufficient taxable income will not be available to offset the interest of deferred income tax assets in the future, the book value of deferred income tax assets is written down. When it is possible to obtain sufficient taxable income, the amount written down shall be reversed.

### **3.14 Income Tax**

Income tax includes current income tax and deferred income tax. Except for the adjusted goodwill resulting from the merger of enterprises, or the deferred income tax related to transactions or events directly included in the owner's rights and interests, it is included in the profits and losses of the current period as income tax expenses.

Current income tax is the amount of income tax payable in the current period calculated according to the amount of taxable income in the current period. The amount of taxable income is derived from the corresponding adjustment of the accounting profit before tax in the current year in accordance with the relevant provisions of the Tax Law.

Based on the temporary difference between the book value of assets and liabilities on the balance sheet date and the tax basis, the company adopts the balance sheet liability method to confirm deferred income tax.

All temporary differences in tax payable recognize the related deferred income tax liabilities unless the temporary differences in tax payable arise in the following transactions:

- A. Initial confirmation of goodwill, or initial confirmation of assets or liabilities arising from transactions with the following characteristics: the transaction is not a merger of enterprises, and the transaction does not affect accounting profits or taxable income at the time of occurrence;
- B. For tax-payable temporary differences related to investments of subsidiaries and joint ventures, the time for the temporary differences to be reversed can be controlled and the temporary differences may not be reversed in the foreseeable future.

For deductible temporary differences, deductible losses and tax credits that can be carried over in subsequent years, the Company recognizes the deferred income tax assets arising therefrom, unless the deductible temporary nature of the assets is possible, subject to the possibility of obtaining future taxable income to offset deductible temporary differences, deductible losses and tax credits. Differences arise in the following transactions:

- A. The transaction is not a merger of enterprises, and it does not affect accounting profits or taxable income at the time of the transaction.
- B. For deductible temporary differences related to investments of subsidiaries and joint ventures, and meeting the following conditions, it is recognized that the corresponding deferred income tax assets are likely to be reversed in the foreseeable future and that taxable income to offset temporary differences is likely to be obtained in the future. This is the case.

On the balance sheet date, the company's deferred income tax assets and deferred income tax liabilities are measured at the applicable tax rate during the period of anticipated recovery of the assets or liquidation of the liabilities, and reflect the income tax impact of the anticipated recovery of assets or the manner of liquidation of liabilities on the balance sheet date.

On the balance sheet day, the company reviews the book value of deferred income tax assets. If the amount of taxable income is likely to be insufficient to offset the interest of deferred income tax assets in the future, the book value of deferred income tax assets will be written down. When it is possible to obtain sufficient taxable income, the amount written down shall be reversed.

### 3.15 Changes of accounting policies and accounting estimates

#### 3.15.1 Changes of accounting policies

There is no accounting policy change.

#### 3.15.2 Change of accounting estimates

There were no changes of accounting estimates during the reporting period.

## 4 Taxation

Applicable taxes for the Company:

Items	Tax basis	Tax Rate
Corporate income tax	Taxable income	25%

Harsha Precision Bearing Components (China) Co., Ltd.  
Notes to the financial statements

Value-added Tax	Taxable income generated from sales of goods	13%
Urban Maintenance & Construction tax	Turnover tax payments	7%
Education additional fee	Turnover tax payments	3%
Local education additional fee	Turnover tax payments	2%

## 5. Notes to the financial statements

Unless otherwise noted, the following annotated items refer to December 31, 2025, December 31, 2024. Current period refers to the year 2025, and Previous period refers to the year 2024.

### 5.1 Monetary fund

Item	2025.12.31	2024.12.31
Cash on hand	1,521.00	6,021.00
Cash in bank	2,924,839.01	2,846,916.85
<b>Total</b>	<b>2,926,360.01</b>	<b>2,852,937.85</b>

Note: As of December 31, 2025, there are no funds with limited use, deposited abroad and potential risk of recovery due to mortgage, pledge or freezing.

### 5.2 Notes receivable

Item	2025.12.31	2024.12.31
Bank's acceptance bill	3,744,367.63	408,028.53
<b>Total</b>	<b>3,744,367.63</b>	<b>408,028.53</b>

(1) Notes receivable endorsed or discounted by the Company that are not yet due at the end of the period:

Item	Amount of Derecognition at the End of the Period	Amount of Non-derecognition at the End of the Period
Bank's acceptance bill	4,471,481.45	
<b>Total</b>	<b>4,471,481.45</b>	

### 5.3 Accounts receivable

(1) Disclosure of accounts receivable aging

Aging	2025.12.31		2024.12.31	
	Amount	Percentage (%)	Amount	Percentage (%)
Within 1 year	26,198,162.85	100.00	23,349,786.60	100.00
